DirectToDispatch™

From Detection to Dispatch. Every Second Counts.

3Si's DirectToDispatch (DTD) ensures crime data reaches police dispatchers and first responders in real time, turning verified alerts into action.

Direct Pipeline to Law Enforcement

3Si is the only provider with a direct alerting pipeline to the dispatch centers for over **10,300** law enforcement agencies across North America.

DirectToDispatch (DTD) delivers verified felony intelligence directly from the source to police dispatchers, streamlining critical response. It is not the traditional 911.

Unmatched Capabilities for Safe and Effective Crime Response

Events are verified and sent automatically **with** crime intelligence to a secure portal. Video, audio, LPR, tracking, and crime details delivered on a single screen.

Dramatically reduces response times when every second counts. Actionable intelligence assists first responders in their efforts.

Commitment to True Security

DTD users prioritize **safety** for employees, customers, and officers.

Adopting DTD promises **real protection** when it matters most.
