3Si YOUR WORLD. SAFER.

FOR IMMEDIATE RELEASE

3Si Security Systems Launches DirectToDispatch™, Delivering Critical Crime Data Straight to Police Dispatch for Safer Responses

Malvern, PA – **August 28, 2025** – 3Si Security Systems, a leader in innovative security solutions focused on supporting law enforcement, announces the release of its groundbreaking DirectToDispatch™, or DTD, solution—a transformational technology that sends verified, critical crime intelligence, including video and audio from the source, directly to police dispatch in real time.

DTD is an extension of our proven GPS Tracking Solution, which has delivered verified crime data to law enforcement for over 20 years and aided in apprehending over 20,000 felons.

Building on this foundation and guided by feedback from our law enforcement partners, DTD extends our crime intelligence capabilities to provide live multimedia of verified, felony-level crimes in progress. This first-of-its-kind capability provides law enforcement with the right data at the right time, enabling them to prioritize critical events, make informed decisions, and achieve safer outcomes for the community and first responders.

"Officer safety is at the heart of everything we do," said Matt Kushner, CEO of 3Si Security Systems. "When crimes are in progress, seconds are everything. DirectToDispatch™ ensures police receive timely, reliable intelligence so they know what they are walking into. That preparation enables a planned response and helps officers stay safe."

How DirectToDispatch™ Elevates Crime Response

DTD is an extension of 3Si's proven tracking platform. A platform trusted and used by over 10,300 law enforcement agencies nationwide. It also enables connectivity with security operation centers, video, and alarm monitoring services to transfer crime intelligence seamlessly and quickly. DTD provides police dispatchers with live location data, video, and images of the crime as it unfolds in real time, streamlining coordination to first responders.

Key advantages include:

- **Real-Time Intelligence**: Verified crime data is sent directly to dispatch quickly.
- **Safer Officer Response**: Officers receive critical situational details before arriving on scene.
- **More Efficient Operations**: Eliminates delays common in traditional reporting paths.
- **System Compatibility**: Works alongside existing 911, ASAP to PSAP, and monitoring systems.

From detection to dispatch, every second counts—and DirectToDispatch™ ensures those seconds are used to protect lives, secure assets, and stop crimes in progress.

About 3Si Security Systems

3Si is a leading provider of innovative security solutions, dedicated to creating a safer, more secure world. For over 50 years, we have delivered trusted security technology with a strong focus on supporting law enforcement and protecting our customers against serious crime threats. Leading brands in the financial and retail industries rely on and deploy our solutions to safeguard people and assets.

We integrate cutting-edge technology with real-world experience to deliver an intelligent platform that protects people, assets, and law enforcement, enabling informed, real-time decision-making. 3Si has relationships with over 10,300 law enforcement agencies that trust its ability to deliver crime intelligence directly to police dispatch for crime prioritization and response.

Our integrated technology suite includes covert GPS Tracking, custom camera and video solutions, modern video management technology, and our award-winning DirectToDispatch™.
