GPS PROTECTION TO SECURE YOUR ATM

Protects and tracks stolen ATMs, cash machines, and cash cassettes for recovery.

ATMs are a prime target for criminals who may attempt to steal the entire machine, force their way inside the safe to steal the cassettes, or attack the ATM technician during servicing to access the cash. 3Si GPS tracking devices are purpose-built to protect the ATM and cash against virtually any physical attack. Once a crime is identified, the 3Si advanced tracking technology is deployed, and local police are dispatched via our exclusive DirectToDispatch™ service, enabling an effective and safe crime response.

WHEN THE CRIME OCCURS

Once the tracker is activated, our own 24/7 security team and local law enforcement are instantly informed. Our advanced tracking system reports the location of the cash every step of the way while law enforcement pursues and apprehends the robbers.

FEATURES

- Triggers automatically when a crime is detected using various sensor options and proprietary Safezone technology
- Silently reports the crime to the 3Si tracking website and local police dispatch
- Precise location technologies via our 4XG platform with GNSS, RF, LTE, and Wi-Fi
- Reliable performance via daily device health check with cellular connection
- Secure website for live tracking
- Text and email notifications of activations and device status
- Stores location data if cellular signal is lost to preserve tracking data
- RF to pinpoint final device location
