

3SI Security Systems
Innovation That Protects

Mountable Enclosure

Compatible with select 3SI Asset Tracker™ and ESO® Devices

3SI's GPS Tracking Solutions combine three location-based technologies, GPS/Cellular/RF, in a single tracking device designed to be easily hidden in frequently stolen items. For applications where devices need to be affixed to an item or surface, 3SI now offers a mountable enclosure. The enclosure is easy to install and allows access to the device inside for charging or reconfiguring.

Your Partner In Cash And Asset Protection

Over 40 years of experience and specialized knowledge in the Security field

Protecting over 250,000 locations worldwide

Global sales and service presence

Long-term relationships with the industry, built on trust and satisfaction

Dedicated Law Enforcement Division - partnered with over 6,600 Law Enforcement agencies worldwide

Only company offering both GPS Tracking AND Cash Protection Solutions

Features

- Durable construction
- Easy to mount and install
- Unit inside remains accessible for charging or to switch out devices
- Uses commercial grade adhesive

Advantages

- Allows Asset Tracker and ESO units to be mounted to a variety of surfaces
- Enclosure is compact in size to allow many mounting configurations
- Commercial grade adhesive ensures secure mounting

Grey enclosure shown with RT Tracker inside

3SI Security Systems offers proven GPS tracking technology that combines aided GPS, Cellular and Radio Frequency (RF) location technologies with a secure tracking website. Available in a variety of designs to track all types of valuable assets, our system apprehends up to 70% of all criminals it tracks and has led to the recovery of millions in stolen cash and assets. Our Cash Protection products range from dye and ink staining to explosive gas neutralization to DNA ink coding. These products help stop crime and catch criminals.

Options

- Mountable enclosure is available in black or gray
- Compatible with 3SI Asset Tracker™ and ESO® (Electronic Stake Out®) Devices, RT and FT models
