

## ATM Tracker™

### Tracks stolen ATMs or cash machines for recovery

Machines that hold cash are a favorite target of thieves. It is not uncommon to use heavy construction machinery to haul entire machines away. ATM Tracker is a powerful tracking device that can protect most machines. It automatically detects the attack and activates 3SI's advanced tracking system.

#### When the Crime Occurs

Once the tracker is activated, our own 24/7 security team and local law enforcement are instantly informed. Our advanced tracking system reports the machine's location every step of the way while law enforcement pursues and apprehends the thieves.

#### Features

- Triggers automatically with tilt, motion, or other sensors and silently reports to 3SI tracking website
- Location updates to secure website every 6 seconds via GPS, Cellular and Wi-Fi
- External sensor integration for additional attack response and machine status updates
- Reliable performance ensured via daily device health check with cellular connection
- Secure website for live tracking
- Text and email notifications of activations and device status
- Stores location data if cellular signal is lost to preserve tracking data
- RF to pinpoint final device location
