

GPS Protection for ATMs and Cassettes

Tracks stolen ATMs, cash machines, and cash cassettes for recovery

Machines that hold cash are a favorite target of thieves. It is not uncommon for criminals to use heavy construction equipment to steal the entire machine or to use tools on hand to break-in to the machine. Criminals also target technicians while they are servicing or replenishing machines. ATM Tracker™ & Cassette Tracker™ are powerful tracking devices that, together, protect machines and their cash cassettes against virtually any kind of physical attack. They automatically detect the attack and activate 3SI's advanced tracking system.

When the Crime Occurs

Once the tracker is activated, our own 24/7 security team and local law enforcement are informed. Our advanced tracking system reports the tracker's location every step of the way while law enforcement pursues and apprehends the thieves.

Features

- ATM and Cassette Tracker trigger automatically when a crime is detected using various sensor options and proprietary Safezone technology
- Automatic triggers are silently reported to 3SI tracking website
- Precise location technologies via our 4XG platform with GNSS, RF, LTE, and Wi-Fi*
- Reliable performance ensured via daily device health check with cellular connection
- Secure website for live tracking
- Text and email notifications of activations and device status
- Stores location data if cellular signal is lost to preserve tracking data
- RF to pinpoint final device location
