

Asset Tracker™

Protect high-value assets with customizable GPS tracking

Designed for customers who manage their own deployments, Asset Tracker™ can protect any high-value asset targeted by thieves. With multiple activation triggers and configurable settings, customers can manage how the device is deployed and the trigger needed, based on the asset being protected.

When the Crime Occurs

Based on customer-chosen settings, Asset Tracker will alert chosen contacts to the crime and report tracking data to the customer.

Features

- Configurable trigger options, update rates, and interval reporting
- Precise GPS/GNSS, Cellular and WiFi location technologies
- RF to pinpoint final tracker location
- Configurable (Geo) fences and alerts
- Stores location data if the cellular signal is lost during tracking
- All data stored for evidentiary purposes
- Secure website for live tracking
- Text and email notifications
- Perfect for covert and mobile applications
- Easy to use and virtually no maintenance required
- Inductive or USB charging

Our solutions

Tracking uses multiple technologies to help police track crimes, recover stolen property and arrest criminals

Cash Tracing uses ink, smoke, and dye to foil robberies, recover stolen cash and apprehend criminals

SaaS Safety Systems use APP technology to protect staff members against crime and provide detailed reporting to increase efficiency and reduce costs

The 4XG Asset Tracker utilizes GNSS (Global Navigation Satellite System) and WiFi technology. 4XG is currently offered in North America only. For other countries, we provide the 3XG Asset Tracker, which utilizes GPS (Global Positioning System).
