

## ESO<sup>®</sup> - Electronic Stake Out

### Cost-effective and reliable GPS tracking tool for law enforcement

Law enforcement officers need a technological edge in the fight against crime. ESO is a tracking device designed to be hidden inside frequently-stolen items to allow law enforcement to track the items and effect an arrest. It can be hidden inside vehicles, bags, cash, bikes, or other high-value items.

### When the Crime Occurs

ESO automatically activates and triggers an alert to law enforcement and our advanced tracking system starts reporting the location of the ESO every step of the way. The officers can view the precise location from a safe distance until they are ready to apprehend the suspects. As our law enforcement partners, you can rest assured our dedicated team at 3SI is committed to provide the support you need to break the crime cycle because we are stronger together.

### Features

- Multiple vessel options
- Configurable trigger options, update rates, and interval reporting
- Precise GPS, Cellular and RF location technologies
- Configurable (Geo) fences and alerts
- Stores location data if cellular signal is lost during tracking
- All data stored for evidentiary purposes
- Secure website for live tracking
- Text and email notifications of activations and device status
- Perfect for covert and mobile applications
- Easy to use and virtually no maintenance required
